SOME RAILWAY RUMORS

FUNDS AGAIN ACCUMULATING IN
NEW YORK BANKS.

New York, March 6.—The speculative fraternity operated on the long side of the stock market today, but on a moderate scale. They seemed to draw favorable conclusions from the action on yesterday's market of the Kansas City Southern stocks and Canadian Pacific group, based in one case on rumors of commercial activity by Harriman and in the other on an absorption of Wisconsin Central in the system. The effect was seen in the favor shown today to stocks of minor railroad systems which might be merged to advantage in larger systems.

The confidence with which several stocks were pushed forward was not at all impaired by the fact that Kansas City Southern itself was quite violently reactionary under the weight of profit-taking sales, while the Canadian group was neglected and inclined to be heavy. Outside of the rather obscure stocks to which the speculation turned the market operations were not on an important scale. The evidence that funds are again accumulating in banks induced an expectation of a renewal of a pressure for investment which has shown some signs of flagging, and especially in the tone of the bond.

A further outflow of gold is viewed with entire equanimity. The net price conditions at the end of the day reveal the conclusive character of the dealings. The decrease in the cash holdings of the banks was unaffected by the known movement of money; the matter has little importance owing to the soft tons manifested by all departments of the money market. Bonds were firm. Total sales, par value, \$1,418,000. United States coupons advanced 1/4 cent on call during the week.

the present surplus above legal requirements, \$12,382,925. It had been anticipated that with another New York City bond sale and one or two other larger offerings loans would show an expansion, but this was not the case. The banks are gaining from the interior and the receipts from this source are more than sufficient to offset the export of gold, which still continues in small volume.

The summary of state banks and trust companies in Greater New York not reporting to the New York clearing house showed larger changes for the week than those noted by the associated banks. Loans of the state banks and trust companies decreased \$1,125,000 last week. The loss in specie and legal was \$2,234,400, while net deposits fell off \$4,718,900. The actual cash reserve of the clearing house banks is now 25.94 per cent, the cash reserve in vaults carried by the state banks is 14.22 per cent and the cash in vault reported by trust companies is 18.23 per cent.

GRAIN AND PROVISIONS.
Chicago, March 6.—Buying by shorts who had sold on yesterday's sharp break, caused firmness in the wheat market today. At the close prices showed a net gain for the day of 1/2 cent.

Leading bulls gave the May delivery market support at various points, but the principal demand came from those who had sold short yesterday. The volume of trading, however, was not large. Many traders were inclined to hold aloof today owing to forthcoming report of government experts, which will be made public Monday and which will show the actual amount of wheat in farmers' hands in March. Throughout the day prices fluctuated over a range of 1/2 cent. May selling between 1.14 1/2 and 1.15 1/2. The market closed strong at almost the top, with May at 1.14 1/2, July at 1.14 1/2 and August at 1.14 1/2.

New high records for the season were established in all deliveries of corn. May selling at 82 1/2 and July at 83 1/2. The market was bullishly affected by light country acceptances, strength of wheat and official forecast of unsettled weather for the corn belt. The close showed net gains of 1/2 cent. May being at 65 1/2, July at 66 1/2 and August at 66 1/2.

Realizing by country holders caused a moderate weakness in oats at the start, but the market rallied and closed strong. Unsettled firm. At the close prices were 1/2 higher. May being at 5 1/2 and July at 5 1/2.

Provisions were strong all day and closed at net gains of 1/2 cent to 3/4 cent. The leading futures ranged as follows:

WHEAT	Open.	High.	Low.	Close.
May	1.14 1/2	1.15 1/2	1.14 1/2	1.14 1/2
